

VELOUR NUBUCK CARE

colourless, 75 ml
Art. No. 900082

Special care product for all types of suede, buckskin, nubuck and textile materials.
Cares for and impregnates modern suede shoes equipped with a membrane.

900082

Applicator sponge

Technology

Intensifies and brightens the colours of the leather by transporting pigments from the deeper layers of leather to the surface. The leather remains soft and supple.

Application area

Suitable for all nubuck-like suede leather. Colour-neutral care product, i.e. can be used for all leather colours. Especially suitable for shoes with GORE-TEX®-Membrane.

How to use

Apply the care product only to dry and cleaned leather surface. Shake bottle before use. Dab the liquid over the entire shoe and spread it evenly. Allow to dry well. Then roughen again with a suede brush or a rough sponge.

ATTENTION: The valve should be activated before each use so that enough care product enters into the sponge.
