

antibite™

natural protection against bugs and ticks

Antibite™ The environmentally friendly repellent treatment

Antibite™ is a technique for treating textiles with an insect repellent. The base ingredient of Antibite™ is IR3535, a substance that has been on the market for over 30 years.

- A natural substance made by amino acids, named IR3535.
- Nanotechnology treatment secure a long-life function, that lasts up to 80 washes.
- No harmful side effects on humans or animals.

Antibite is a repellent treatment, not a pesticide

- It does not kill insects, it repels them.
- Not absorbed by the body.
- Odorless and has no side effects.
